About Us

Virtualis is a consulting agency for international training, exchange and mobility.

Our past experience gained through participation in LLP placements project has shown the need for specialised body in Slovenia that would be able to help beneficiaries of mobility grants to find appropriate receiving institutions and help them organise their stay in the host country. We believe that an intermediary institution specialised in students' and graduates' training, represents a bridge between education and economy, facilitating passage of young people from the world of study to the world of labour.

We proposed ourselves to become the first specialised body in Slovenia offering high quality service in international placements, being it in outgoing or incoming mobility.

Our Location

Our agency is located in Koper, in the south-west of Slovenia, the area bordering Italy and Croatia. Already for its location, our region is particularly exposed to interaction, cooperation and exchange between the three neighbouring countries. Besides, having one of the most important ports in the northern Adriatic, it is open to a vast international cooperation and exchange. The region has also a strong cultural and knowledge based environment, since in its capital city Koper one of Slovene universities is located.

Our Mission

Our main focus is on international training with the aim to cooperate in international projects and to inform interested parties about possibilities of international exchange and cooperation.

For the accomplishment of this purpose we have established cooperation with similar international organisations in different EU countries and we are building a national network of enterprises willing to accept international trainees. Through our cooperation we wish to create suitable conditions for quality training of people all over Europe and by this means enable the flow of knowledge and work experience in the common European labour market.

We will strive that our activities will lead towards the fulfilment of the goals set by European Commission in Lisbon Strategy and the LLP programme, in particular the following:

- to support participants in training and further training activities in the acquisition and the use of knowledge, skills and qualifications to facilitate personal development,
- to improve the quality and to increase the volume of mobility throughout Europe,
- to improve the transparency and recognition of qualifications and competences including those acquired through non-formal and informal learning,
- to improve the quality and to increase the volume of co-operation between institutions or organisations providing learning opportunities, enterprises, social partners and other relevant bodies throughout Europe and
- to encourage the learning of modern foreign languages.

Our Service

We are operating in our local environment, where we have connections with companies and institutions that are willing to accept international trainees. We match offer and demand of placements and provide for administrative issues.

We provide for the accommodation of participants and help them to integrate into local environment, also by offering them suitable cultural and language preparation when needed. We provide for mentoring, monitoring, evaluation and certification of placement periods as well.

It is our desire to become a reference centre for international training in general, therefore we invite you to contact us if you wish to promote your offers of international training, summer schools, language schools and other forms of formal or nonformal education.

Let's change Virtuality into Reality!

We wish to welcome you in Slovenia.
