Siège international :  
Avenue de Chamonix, 7  
1207 Genève  
Suisse

Tel. : +41 22 550 12 27

LEONARDO DA VINCI  
PROGRAMME

## About us

Giving official names to craters on Mars, finding flint arrowheads dating back to the Neolithic Age, launching a photograph-based programme to identify marine mammals, riding horses in Kirghizstan and tracking for the Snow Panther, or... simply baking blackberry pies :participants (children and young enrolling into Objectif Sciences International Camps) have met many challenges over the past years!

Hundreds of Campers (children and young aged 7 to 18) have attended our Science Camps in our two camp locations (in Saint-Anthème, in France and in Quebec, North America) and in more than 30 different Science stays and destinations throughout the World (South Pacific, Kirghizstan, Japan, etc). Besides these holiday in Science Camps, Objectif Sciences International, a non-profit making Association created in 1992, has been organizing Science classes, Seminars and Technical Training Courses for many years ; a new teaching method called "hands-on Science" was introduced in 2005 and has been continuously improved.

Our staff is working in Objectif Sciences International (OSI) a NGO based in Geneva and with a subsidiary in France based in Auvergne.

In the framework of the Leonardo da Vinci Programme, OSI acts as a receiving.

Our internships department is specialized in monitoring and organizing work experience. The key to OSI success results in the quality and professionalism of our staff (high diplomas and experience)

We would like to improve and develop sciences, ecology and communication all over Europe and also as to share many ideas on this topic and to reflect with our partners on how to improve or even to start trainings in this fields. Our activities are carried out by a qualified team of experts.

Ideally at OSI, we are looking for candidates who have a thirst for learning and who would like to acquire additional skills and qualities to boost further their career.

**Thomas EGLI**  
President & Marketing

**Dominique ANDREANI**  
Director

**Jonathan SIGNOR**  
Business Developer

**Amandine JANER**  
Law & Administration

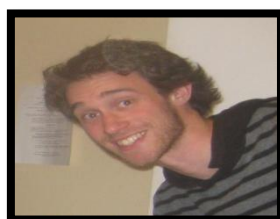

**Adrien LASSERRE**  
Architecture

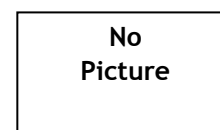

**Hanna KLEINE-WEISCHEDE**  
Communication

**Jérôme MATTHEY**  
Sciences & Pedagogy

**Théo MICHEL**  
NGO Representant

**Audrey-Laure RATTINASSAMY**  
NGO Representant

## Our internships

OSI provides a Programme that includes the following services: social, cultural and integration training, tutoring and project assessment.

We offer several different internship programs in varying fields such as architecture, marketing, business development ... and many more.

Our internships are flexible. The possibilities are very open and depending on participant's input, they could start in marketing, help out with web design and end up in the business development department. Alternatively, they could also be very specific.

Each year, OSI invest a great deal of time and care into the development of our young and multicultural staff.

In addition, by providing the essential competences we also help our participants to establish a solid work experience.

By taking care of each our participants, we promote an open flexible working environment to help students gain essential skills and working knowledge.

We give trainees the chance to apply their knowledge from university to the workplace while simultaneously acquiring new abilities in one of our many departments.

With OSI experience, the participants have the opportunity to learn a range of transferable skills and competences to helps them build up their future career.

Unlike other internship programs, they will be immediately working in a real business environment, gaining practical work experience while being able to take real responsibilities and having a direct impact on our strategic decision making.

Taking up a challenge in this kind of environment, they can gain the concrete skills and cutting edge concepts required to launch a truly successful business career.

### Our French Center (accommodation for each participant)

Station de Montagne Prabouré  
Auvergne- France

OSI provides a Programme that includes the following services : accommodation in our French Center in Auvergne.

## Aims

We would like to help European citizen to acquire new skills, knowledge, qualifications and have them recognized across border in order to improve their employability on changing labour markets.

We would like to exchange best practice, to increase the expertise of our staff and to respond to the teaching and learning needs of participants.

We would like to encourage the exchange of information and to joint discussion amongst all Europe to find solutions about sciences contribution for the environmental protection and also to give the opportunity to share experiences and knowledge and to learn from each other.

## Requisites for taking part

- Aged 18 to 35, be unemployed or in precarious employment
- Know the language of the reception country or a vehicular language sufficiently or English fluent
- Have training, practical professional experience in the occupational sphere of the placement or studying this fields
